

BUSINESS CONTINUITY MANAGEMENT

Satori Consulting enhances your organization's ability to respond to and recover from business-disruptive events. We enable our clients to better anticipate potential threats to their business, implement preventive measures, and mitigate the impact of unavoidable events. Satori's Business Continuity Planning, Testing and Training services provide an important foundation for building a more resilient organization.

THE SITUATION AT HAND

Business continuity management (BCM) programs are necessary for companies to meet regulatory and shareholder requirements, protect their infrastructure and workforce, assure third-party readiness, and maintain a competitive advantage in today's market. Organizations lacking strong BCM practices may incur significant costs in recovering from adverse events; some may even fail to overcome major disruptions.

Common weaknesses include:

- Limited insight into risk exposure and potential consequences for the organization
- Exclusive on disaster recovery, rather than on holistic continuity strategies that consider people, processes, assets, and systems
- Lack of planning governance and alignment
- Unclear roles, responsibilities, and priorities
- Lack of immediate readiness to respond and mobilize as crises occur
- Continuity plans that fail to change according to new conditions within the organization and in the environment

THE SATORI SOLUTION

Our Business Continuity Management services enable organizations to enhance the processes, tools, systems, and human resources required for effective enterprise-wide risk management. We place particular emphasis on:

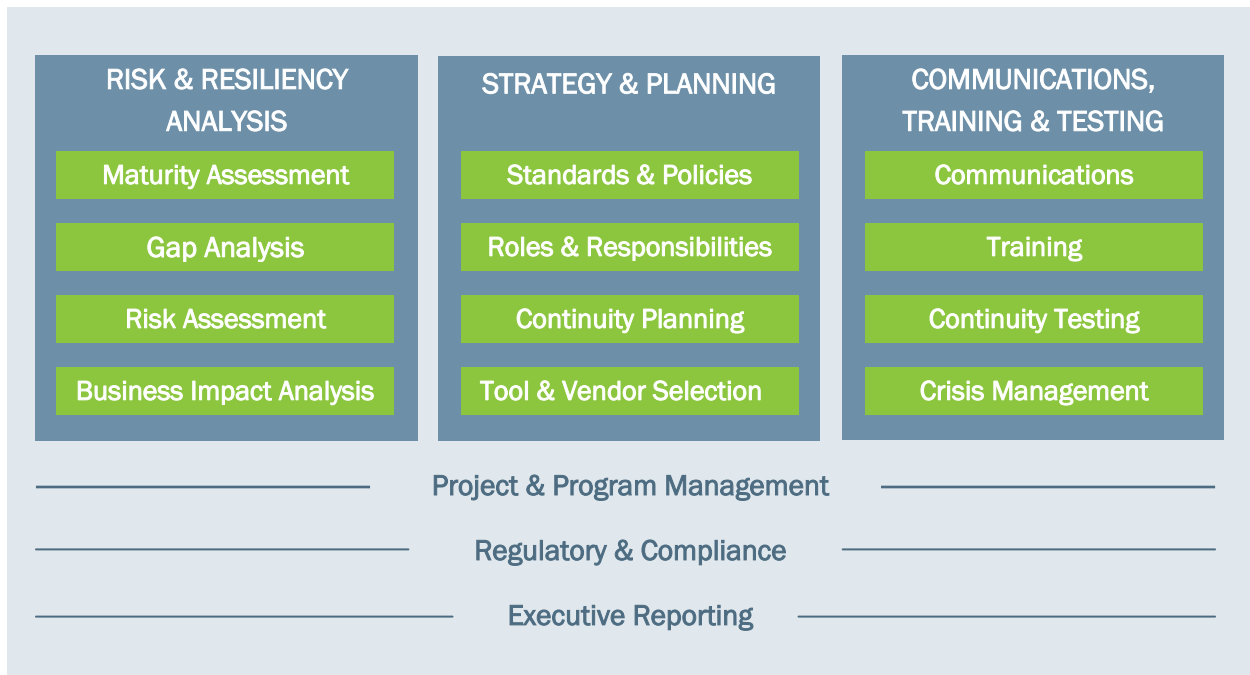

- Project & Program Management
- Regulatory Compliance
- Executive reporting

BENEFITS

Our flexible Business Continuity Management framework offers:

- Greater visibility into risk exposures and their potentially damaging consequences
- A best-in-class, holistic BCM approach that has been successfully implemented by several industry leaders
- Actionable and sustainable continuity plans that support enterprise-wide preparedness objectives
- Informed and accountable staff who are poised to respond to, and enable recovery from, a variety of adverse events.

THE SATORI FRAMEWORK

RISK & RESILIENCY ANALYSIS

We facilitate a comprehensive identification of threats and their associated financial, operational, and reputational impacts on a company. We evaluate existing business continuity management programs, identify areas for improvement, and prioritize actions to ensure that the most critical preparedness gaps receive prompt attention.

STRATEGY & PLANNING

With a focus on accountability, we guide plan enhancements at the business unit, department, and enterprise levels. Our framework provides opportunities for testing the viability of response and recovery activities before a damaging event occurs. We ensure that plans are aligned with corporate policies and standards and are based on best-in-class business continuity practices.

COMMUNICATIONS, TRAINING & TESTING

We enhance resilience by increasing the collective knowledge of an organization, using tools such as targeted communication campaigns and preparedness drills and exercises. We also help an organization achieve preparedness through frequent, simulated launches of continuity plans, using credible threat scenarios and assumptions.

At Satori Consulting, our mission is simple: to work side-by-side with clients to discover opportunities and solve problems. We strive to provide both comprehensive and expert service, mindful of every client's unique needs. Our team of highly-skilled management consultants brings a wealth of industry and functional experience to provide wide-ranging services in project and program management, risk management, change management, organizational effectiveness, strategy and advisory, business process engineering, performance management, and infrastructure and technology.
