

# RISK MANAGEMENT SERVICES

Satori Risk Management helps businesses develop proactive responses to regulatory trends and strengthening standards of accountability. Drawing on our deep experience and knowledge of established industry standards, our clients build a culture that prioritizes the continuous evaluation and management of risk. We help organizations cultivate the processes, tools, and capabilities they need to establish an enterprise-wide risk management framework that will position them avoid penalties, reputational damage, and financial loss.

## THE SITUATION AT HAND

Public and private sector organizations alike must actively evaluate and manage risk to avoid penalties, reputational damage, and financial loss. Regulatory trends and strengthening standards of accountability demand that managers fully embrace a culture of risk management.

Satori's clients have made the commitment to further embed risk management into their culture, recognizing this as a necessity for survival. Whether the goal is to build a risk program or enhance existing capabilities, Satori works with our clients to overcome the typical challenges in this journey:

- A lack of transparency among groups responsible for risk making it difficult to obtain a complete risk profile.
- Anticipated regulatory requirements necessitating the implementation of new standards or external reporting.
- Evolving threats, internal and external, requiring a flexible program.
- Lack of qualified resources to manage and implement program enhancement and advance the maturity of the program.
- Scarce resources to meet increasing demands from the public and investor communities.

## THE SATORI SOLUTION

Our Risk Management services help organizations develop and implement the processes, enablers, tools, and capabilities that will yield a risk-based approach for effective enterprise-wide risk management. We customize the following approaches based on our client's unique needs:

- **Augment and Enable** – Satori resources are placed within the client risk team to enhance a risk management program while transferring the necessary skills and knowledge to manage the program themselves.
- **Risk Management Workshop** – A single-day event that brings key personnel together in a working session designed to disseminate information, clarify a vision, and develop a roadmap to yield quick win opportunities.
- **Health Check** - Development of a tool and process to track ongoing status, certify compliance, and drive long-term program improvement.
- **RM Test or Event Program Management** – A one-time readiness assessment to prepare for a test, drill, or integrated industry exercise.

## BENEFITS

**We work to build a culture of proactive risk management, which enables our clients to:**

- Address the risk of loss from inadequate or failed processes, systems, people, or external events
- Guard against a failure in confidentiality, integrity, or availability of an information system or data
- Respond effectively to disruptions to business
- Avoid penalties and reputational damage

## RISK MANAGEMENT SERVICES

Based on our knowledge and expertise, we focus on four key risk domains.

### Operational Risk

We enable organizations to evolve their operational risk program from a reactive discipline where risk is addressed after an incident occurs to one which is more proactive.

### Regulatory Risk & Compliance

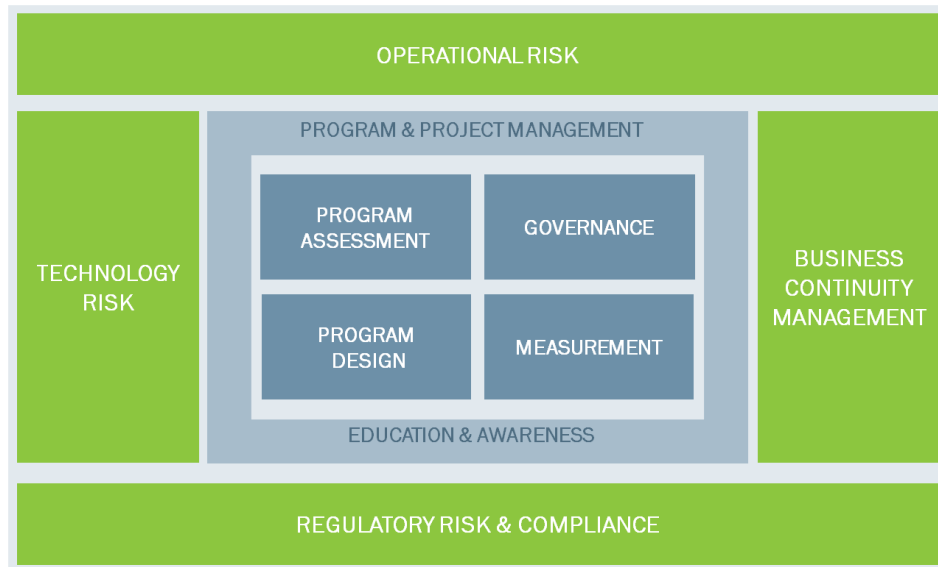

We help clients interpret the increasingly complex patchwork of regulations and remain a step ahead.

### Business Continuity Management

Our Business Continuity Management solution is an end-to-end approach encompassing the entire life cycle of business continuity and crisis management.

### Technology Risk

We integrate safety, flexibility, and transparency to the task of preventing purposeful or accidental harm to technology-driven assets or information.

We also focus on the critical success factors for any effective risk management program.

### PROGRAM ASSESSMENT

We gauge an organization's ability and readiness to implement a risk program and meet regulatory and business requirements.

### GOVERNANCE

We design or strengthen the structure and oversight mechanisms required to manage risk while maintaining transparency across the enterprise.

### PROGRAM DESIGN

We define and develop a strategy and processes for collecting and sharing information, minimizing the manually intensive aspects of risk management.

### MEASUREMENT

We assess the effectiveness of risk programs and controls and enable the sharing of information, ensuring that the appropriate parties are able to make timely decisions.

**PROGRAM & PROJECT MANAGEMENT AND EDUCATION & AWARENESS** are the drivers for ensuring that any initiative meets the ultimate goal of embedding risk management into the culture.

*At Satori Consulting, our mission is simple: to work side-by-side with clients to discover opportunities and solve problems. We strive to provide both comprehensive and expert service, mindful of every client's unique needs. Our team of highly-skilled management consultants brings a wealth of industry and functional experience to provide wide-ranging services in project and program management, risk management, change management, organizational effectiveness, strategy and advisory, business process engineering, performance management, and infrastructure and technology.*
