Cloud Transformation

- Application & Infrastructure Rationalization
- Transition Plan Development
- Detailed Application Migration Plan
- Transition Program Management

Cloud Operations

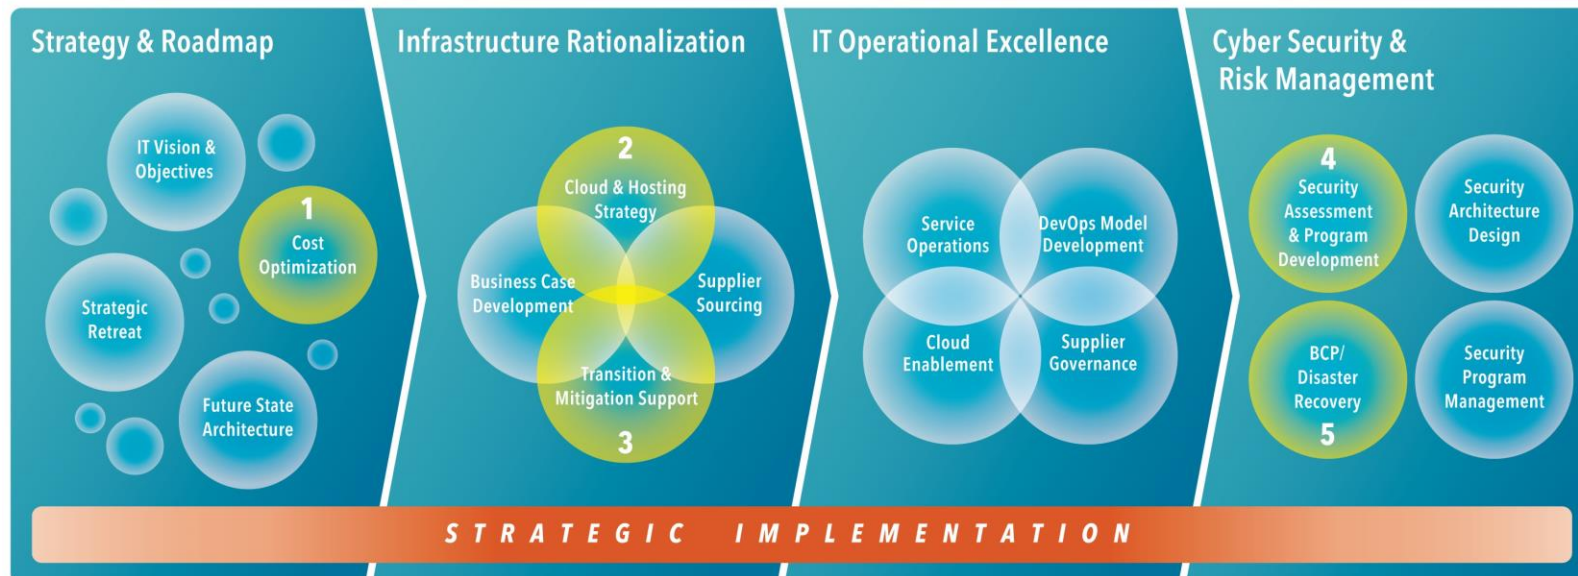

- Cloud Governance
- Financial Management
- Operations Model Development
- Process Integration
- Cloud Automation

SATORI: IT INFRASTRUCTURE SERVICES

PROVEN PARTNER TO DEFINE & DELIVER REQUIRED CHANGE

Strategic Services range from Strategy & Roadmap Development through Implementation in key areas:

1. **Cost Optimization** – we typically identify 18-24% savings in non-optimized IT environments.
2. **Cloud & Hosting Strategy** – we understand how and when cloud can be leveraged to move from Capex to Opex spend models while establishing flexibility as the market matures.
3. **Transition & Migration Support** – we bring best practice transition management practices to enable rapid migration to the new hosting model while minimizing business risk.
4. **Security Assessment & Program Management** – we balance compliance (PCI, ISO, HIPAA, HITRUST) and security requirements to deliver real risk management for clients
5. **Business Continuity (BCP) & Disaster Recovery (DRP) Planning** – review and development of plans to support IT and business continuity
